## SUMMARY

Senior Frontend Engineer with 4+ years of experience building scalable React.js and Next.js applications across health-care, CMMS, and e-commerce platforms. Proven track record of reducing API calls by 45%, boosting user engagement by 60%, and improving application performance by 35% across globally deployed products. Skilled in component architecture, performance optimization, reusable UI libraries, and Agile delivery within cross-functional teams.

## WORK EXPERIENCE

### Senior Software Engineer — 24/7 Software, Pune

Jan 2025 – Apr 2026

- **Cut redundant API calls by 45%** by optimising client-side data fetching using **React Query** and **React Router**, significantly boosting overall application performance.
- **Reduced page load times** by implementing **virtualisation** for large-scale datasets in a high-traffic **CMMS** platform, improving rendering efficiency across global-scale venue operations.
- **Improved UI responsiveness and code maintainability** by refactoring legacy **jQuery** workflows into modular, scalable **React** components using `async/await` patterns.
- **Standardised 12+ reusable UI components** documented with **Storybook**, ensuring consistent design patterns and accelerating team onboarding.
- Ensured seamless **cross-browser compatibility** and modernised UI capabilities across the frontend stack.
- Collaborated cross-functionally with **QA**, **product**, and **backend** teams to deliver critical features on time in a real-time, globally scaled environment.

### Senior Software Engineer — Happiest Minds Technologies, Bengaluru

Apr 2023 – Jan 2025

- **Drove 60% increase in engagement** among healthcare professionals by designing and delivering a responsive e-magazine platform using **Next.js**, **TypeScript**, and **ReactJS**.
- **Reduced login-related issues by 40%** by implementing a secure, scalable authentication system using **OAuth** and **JWT**, strengthening data protection.
- **Improved query response times** by building advanced job search features with intelligent filtering and a high-performance form builder (**Form.io**).
- Boosted user engagement and navigation quality by developing interactive UI components including **carousels** and **mega menus**.

### Software Engineer — Tech Mahindra, Bengaluru

Aug 2021 – Apr 2023

- Contributed to the frontend development of a large-scale **e-commerce** platform for BT Consumer Electronics, delivering a seamless and intuitive checkout experience.
- **Enhanced application performance** by implementing **lazy loading**, optimising **Redux** state management, and refactoring **ReactJS** components for improved scalability.
- Drove measurable improvements in performance, stability, and code quality through proactive codebase maintenance.

## SKILLS

|                      |                                                                                                                                                                                  |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages & Styling  | JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS                                                                                                                                 |
| Frameworks/Libraries | ReactJS, Next.js, Redux, Redux Toolkit, React Query, React Router, Material UI, AG Grid, Form.io, Storybook                                                                      |
| Tools & Workflow     | Git, Postman, VS Code, JIRA, REST APIs, GraphQL, MongoDB, AWS, Jest, React Testing Library                                                                                       |
| AI Tools & Skills    | Claude, Cursor, ChatGPT, GitHub Copilot, Agentic AI, Prompt Engineering, AI-Assisted Development, Code Generation, Refactoring & Debugging, Test Case & Documentation Generation |
| Miscellaneous        | Agile, Scrum, CI/CD, Design Patterns, System Design, Data Structures, Performance Optimisation, Cross-Browser Compatibility                                                      |

## EDUCATION

---

### Lovely Professional University

Bachelor of Technology (B.Tech.), Computer Science & Engineering

2016 – 2020

CGPA: 7.5/10.0

## KEY PROJECTS

---

### CMMS — Inspections & Health and Safety

*React.js, JavaScript, React Query, AG Grid, REST APIs*

Developed core modules for an enterprise-grade Computerised Maintenance Management System used for facility operations, inspections, and health & safety workflows. Owned the Inspection module end-to-end — dynamic forms, scoring workflows, linked work orders, file uploads, and grid-based operational views. Built reusable React components, handled complex state management, and integrated APIs to improve UX across enterprise workflows.

### Happiest Health — e-Magazine Platform

*Next.js, TypeScript, ReactJS, OAuth, JWT, Storybook*

Developed the frontend of a responsive digital magazine platform for healthcare professionals. Implemented secure OAuth/JWT authentication, advanced job search with intelligent filtering, and interactive UI components including carousels and mega menus. Drove a **60% increase** in engagement among healthcare professionals.

## ACHIEVEMENTS

---

- Awarded the **Star Team Award** for outstanding contribution to the CareerEdge project at Happiest Minds Technologies.
- Received formal commendation from the technical lead for handling complex development challenges in the Happiest Health project.
- Spearheaded a performance benchmarking initiative that identified key bottlenecks, leading to a **35% improvement** in application speed and user experience.
- Collaborated with design teams to deliver a cohesive UI aligned with brand guidelines, resulting in a **30% increase** in user satisfaction ratings.
